Studying digital infrastructure

- Society is starting to realize its dependency on digital systems and through them (Trump and ICC emails, recent AWS / Cloudflare outages, Spain power outage...)
- This will only get worse! (climate change + geopolitical conflicts)
- The “cloud” has always been about abstracting the infrastructure, but the abstraction is leaking (and it’s a good thing)

Topics about digital infrastructure for the workshop: **impact** (environmental, social), **governance** (power structures, democratic processes), **resilience**

Target audience

Inter-disciplinary: computer science, STS, non-academia

Based on self-identified field during registration:

- 34 computer science
- 8 sustainable ICT
- 4 social science
- 3 STS
- 1 other

Program for the day

Time (CET)	Event
08:45 – 09:15	<i>Registration and welcome coffee</i>
09:15 – 09:30	Introductory speech
09:30 – 10:45	<u>Keynotes – Fieke Jansen & Anne-Cécile Orgerie</u>
10:45 – 12:15	<u>1st Session + Break-out</u>
12:15 – 13:30	<i>Lunch (Standing-up)</i>
13:30 – 15:30	<u>2nd Session + Break-out</u>
15:30 – 16:00	<i>Coffee Break</i>
16:00 – 18:00	<u>3rd Session + Break-out</u>
18:00 – 18:15	Concluding remarks
18:15	<i>End of workshop</i>
